Development of Fluorescent Dyes:

Neelikon started the development work of Yellow Naphthalimide and Coumarin dyes in late 90's and introduced these products in the world market in the early part of this century under the brand name "Neeliglow". This makes Neelikon a prime manufacturer from India of Fluorescent Dyes in the International Market for more than two decades.

All the Neeliglow Fluorescent Dyes which Neelikon offers are developed by indigenous technology. Neeliglow Fluorescent Dyes give high colour value and fluorescent intensity, with good stability and light fastness properties.

Neeliglow range of Fluorescent Dyes consists of many vibrant colours giving shades such as Yellow, Magenta, Pink, Red & Orange.

We welcome your enquiries for the development of new speciality dyes, pigments & chemicals.

Thank you for your interest in our products.
